Naloxone Saves
Tips for Pharmacies to Save Lives with the State Standing Order for Naloxone

"Americans are urged to carry this lifesaving medication that can reverse the effects of an opioid overdose."

From U.S. Surgeon General Jerome Adams, MD MPH:

How Pharmacists Can Help

Community Pharmacies are authorized to dispense naloxone without a patient-specific prescription under the state standing order for naloxone.

Everyone is Eligible to Obtain Naloxone

Anyone who may be at risk for an opioid emergency OR who may be in a position to respond to help someone else including an opioid user, friend, relative, co-worker, health worker, bus driver, church, clinic or business.

Tips for Success

1. Screen Patients for Opioid Risk
Define ‘high-risk’ criteria to trigger a recommendation based on the opioid prescription, PDMP record and history.

2. Fit the Standing Order into your workflow
Activate technicians in screening, processing claims and preparing the prescription with education materials.

3. Have Naloxone Ready when Recommending
Avoid delays, coverage surprises and hesitancy by preparing naloxone along with the rest of the patient’s medicines.

4. Stock Nasal Spray and Injectable Forms
Cost and coverage varies but most patients who accept your recommendation will accept the formulation that is covered or affordable.

5. Avoid Stigma when Counseling
Think risky medicines not risky people. Instead of overdose use bad reaction or opioid breathing emergency. Consider risks to anyone in the household.

6. Promote Naloxone
Use posters, counter signs, banner ads, social media posts, marquees and more to alert your customers and community to start the conversation.
