

Naloxone Saves

BEHAVIORAL HEALTH

Save a Life! Prescribe Naloxone with Every Opioid!

On average, more than 90 Americans die by opioid overdose every day

- Make prescribing Naloxone a **UNIVERSAL PRACTICE**, with every opioid prescription.
- Naloxone blocks the effects of opioids, rapidly reversing overdose.
- Naloxone is a **safe, quick acting** medication that restores breathing.
- Beneficiaries, medical staff, families, and care partners can **easily** be trained to administer Naloxone to **save a life**.
- Always call 911 to obtain medical treatment **as soon as possible** after administering Naloxone.

Co-prescribing
Naloxone is a
best practice.
