

My Dialysis Care Conference

Name:

Date: M T W Th F S

Preferred Time:

_____AM/PM

Location:

___ Chairside

___ Phone Call

___ Private Meeting

___ Other

What is a care conference?

A care conference is a meeting with you and the interdisciplinary team (IDT). The IDT includes you, your kidney doctor, the nurse, social worker, and dietician. You can invite a friend or family member to attend the conference with you. During the meeting, we will discuss your care, what is important to you, and how we can help you reach your goals.

Care conferences occur within the first 13 dialysis treatments or 30 days of admission, at the 90-day re-evaluation, annually, or more frequently, if needed. You can request a conference with your care team anytime.
