Center at Morehouse School of Medicine

Southeast (HHS Region 4)

**ATTC**

Addiction Technology Transfer Center Network  
Funded by Substance Abuse and Mental Health Services Administration

### Event Description:

As addictions professionals, we often have gaps in our education around the basics of how our brain functions as well how that functioning is impacted by substance use, addiction, and recovery. Neuroscience of Addiction is a foundational course designed to introduce the fundamentals of brain functioning in ways that are both understandable and can be effectively utilized in treatment.

### Learning Objectives -

#### Participants in this session will be able to:

1. Verbalize the primary function of the brain.
2. Identify the two primary systems of the brain.
3. Articulate a basic understanding of how learning occurs.
4. Discuss how substance use impacts and is impacted by brain functioning.

**Please invite your friends, colleagues, and loved ones to attend this event with you to learn together and support each other.**

This webinar is provided by a collaboration with the Southeast Addiction Technology Transfer Center (SATTTC) and hosted by Alliant Quality, the quality improvement group of Alliant Health Solutions (AHS), the Medicare Quality Innovation Network-Quality Improvement Organization (QIN-QIO) for Alabama, Florida, Georgia, Kentucky, Louisiana, North Carolina, and Tennessee.
