Pressure Injury Prevention

Patient Safety Network Objectives

Participants will be able to:

- Influence leadership to support for pressure injury prevention.
- Understand and implement best practices and best practice tools for pressure injury prevention.
- Reduce pressure injury occurrences in their facility.

Today's Learning Objectives

- Learn Today:
 - Understand the importance of leadership support for pressure injury prevention (PIP) programs.
 - Identify tools and practices designed to assist with leadership and staff engagement.
- Use Tomorrow:
 - Utilize current data to engage leadership and staff.
 - Apply AHRQ and IHI Tools for engaging leadership.

The Role of Leadership

"High reliability organizations are organizations that operate in complex, high-hazard domains for extended periods without serious accidents or catastrophic failures." [High Reliability | PSNet \(ahrq.gov\)](https://www.ahrq.gov/high-reliability/)

- High reliability organizations are:
 - Use systems thinking to design for safety.
 - Persistently mindful – anticipating problems, detecting them early and responding quickly before harm occurs.
 - Preoccupation with failure; reluctance to simplify reasons behind operations, successes and failures; sensitivity to operations; respect for frontline expertise; and commitment to resilience.

Applying a Leadership Framework to PIP

- The cost of a PIP Program:
 - **Time:** Implementation of a multi-disciplinary team inclusive of nursing, dietician, respiratory therapy and rehabilitation staff. Dedicated time for data collection.
 - **Staffing:** Implementation of a team approach to skin assessment to identify high-risk patients.
 - **Education:** Multi-disciplinary education on staging, early detection and prevention measures.
 - **Finances:** Purchase of mobility assistance devices, skin protection and support surfaces, medical devices designed to prevent pressure injury.

The Cost of Failure to Implement a PIP Program

AHRQ Summary of Meta-Analysis
Additional Cost Estimates 2017

	Studies N	Range of Estimates	Estimates (95% CI)
Pressure Injury	4	\$8,573–\$21,075	\$14,506 (-\$14,506–\$41,326)

AHRQ 2017: AHRQ National Scorecard on Hospital-Acquired Conditions

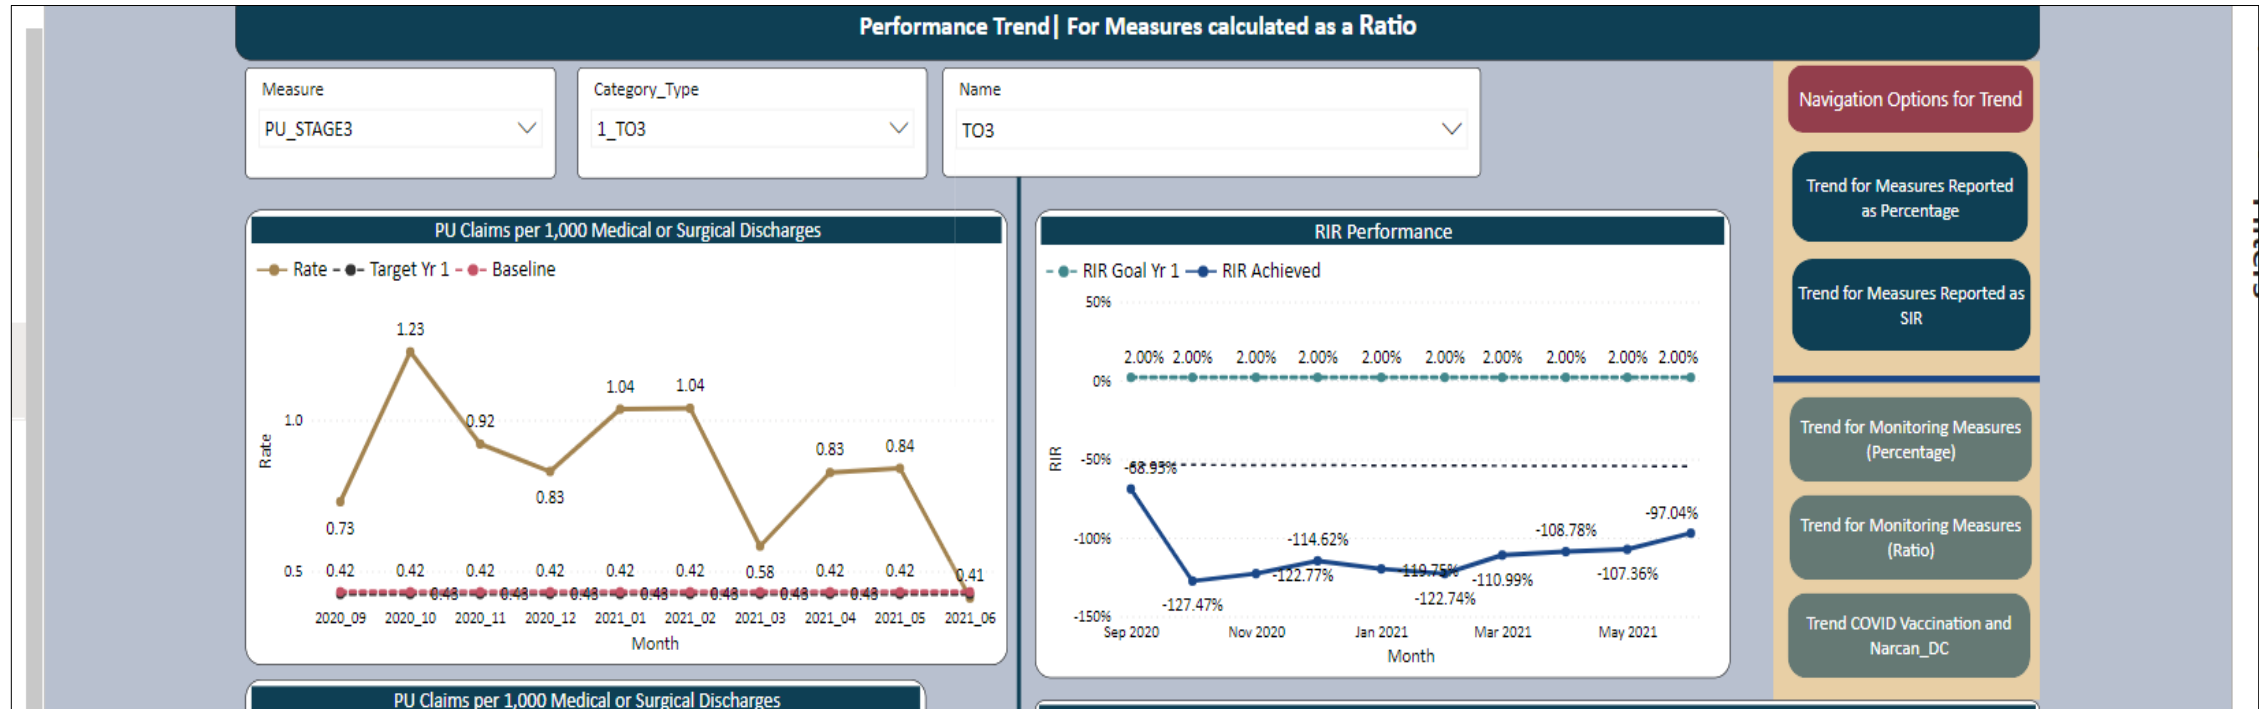

Updated Baseline Rates

Mortality Rate – Pressure Ulcer Stage 3 (7%)

International Wound Journal 2019

Average Increased LOS – 7 days

Key Takeaways

- Learn Today:
 - Understand the importance of leadership support for pressure injury prevention (PIP) programs.
 - Identify tools and practices designed to assist with leadership and staff engagement.
- Use Tomorrow:
 - Utilize current data to engage leadership and staff.
 - Apply AHRQ and IHI Tools for Engaging Leadership.

How will this change what you do?

Getting Started

- Review your current data on Alliant BI portal.
- Review the resource materials provided today.
- Establish a reduction goal – short term and long term.

Questions?

Email us at HospitalQuality@allianthealth.org or call us at 678-527-3681.

HQIC Goals

Behavioral Health Outcomes & Opioid Misuse

- ✓ Promote opioid best practices
- ✓ Decrease high dose opioid prescribing and opioid adverse events in all settings
- ✓ Increase access to behavioral health services

Patient Safety

- ✓ Reduce risky medication combinations
- ✓ Reduce adverse drug events
- ✓ Reduce *C. diff* in all settings

Quality of Care Transitions

- ✓ Convene community coalitions
- ✓ Identify and promote optimal care for super utilizers
- ✓ Reduce community-based adverse drug events

Upcoming Events

December 15, 2021 12 p.m. ET

Toolbox for Skin Integrity Assessment
