Agenda

- Welcome
- HQIC Overview and Goals
- Performance Measures and Accomplishments to Date
- Hospital and Partner Testimonials
- Educational Events and Networking
- Resources
- Looking Ahead
- Q&A/Wrap Up

Alliant HQIC Moderators

Donna Cohen, RN, BSN, CCM
Director, Quality Projects

Karen Holtz, MT (ASCP), MS, CPHQ
Education and Training Lead

Amy Ward, RN, BS, MS, CIC
Infection Prevention Specialist

HQIC Overview

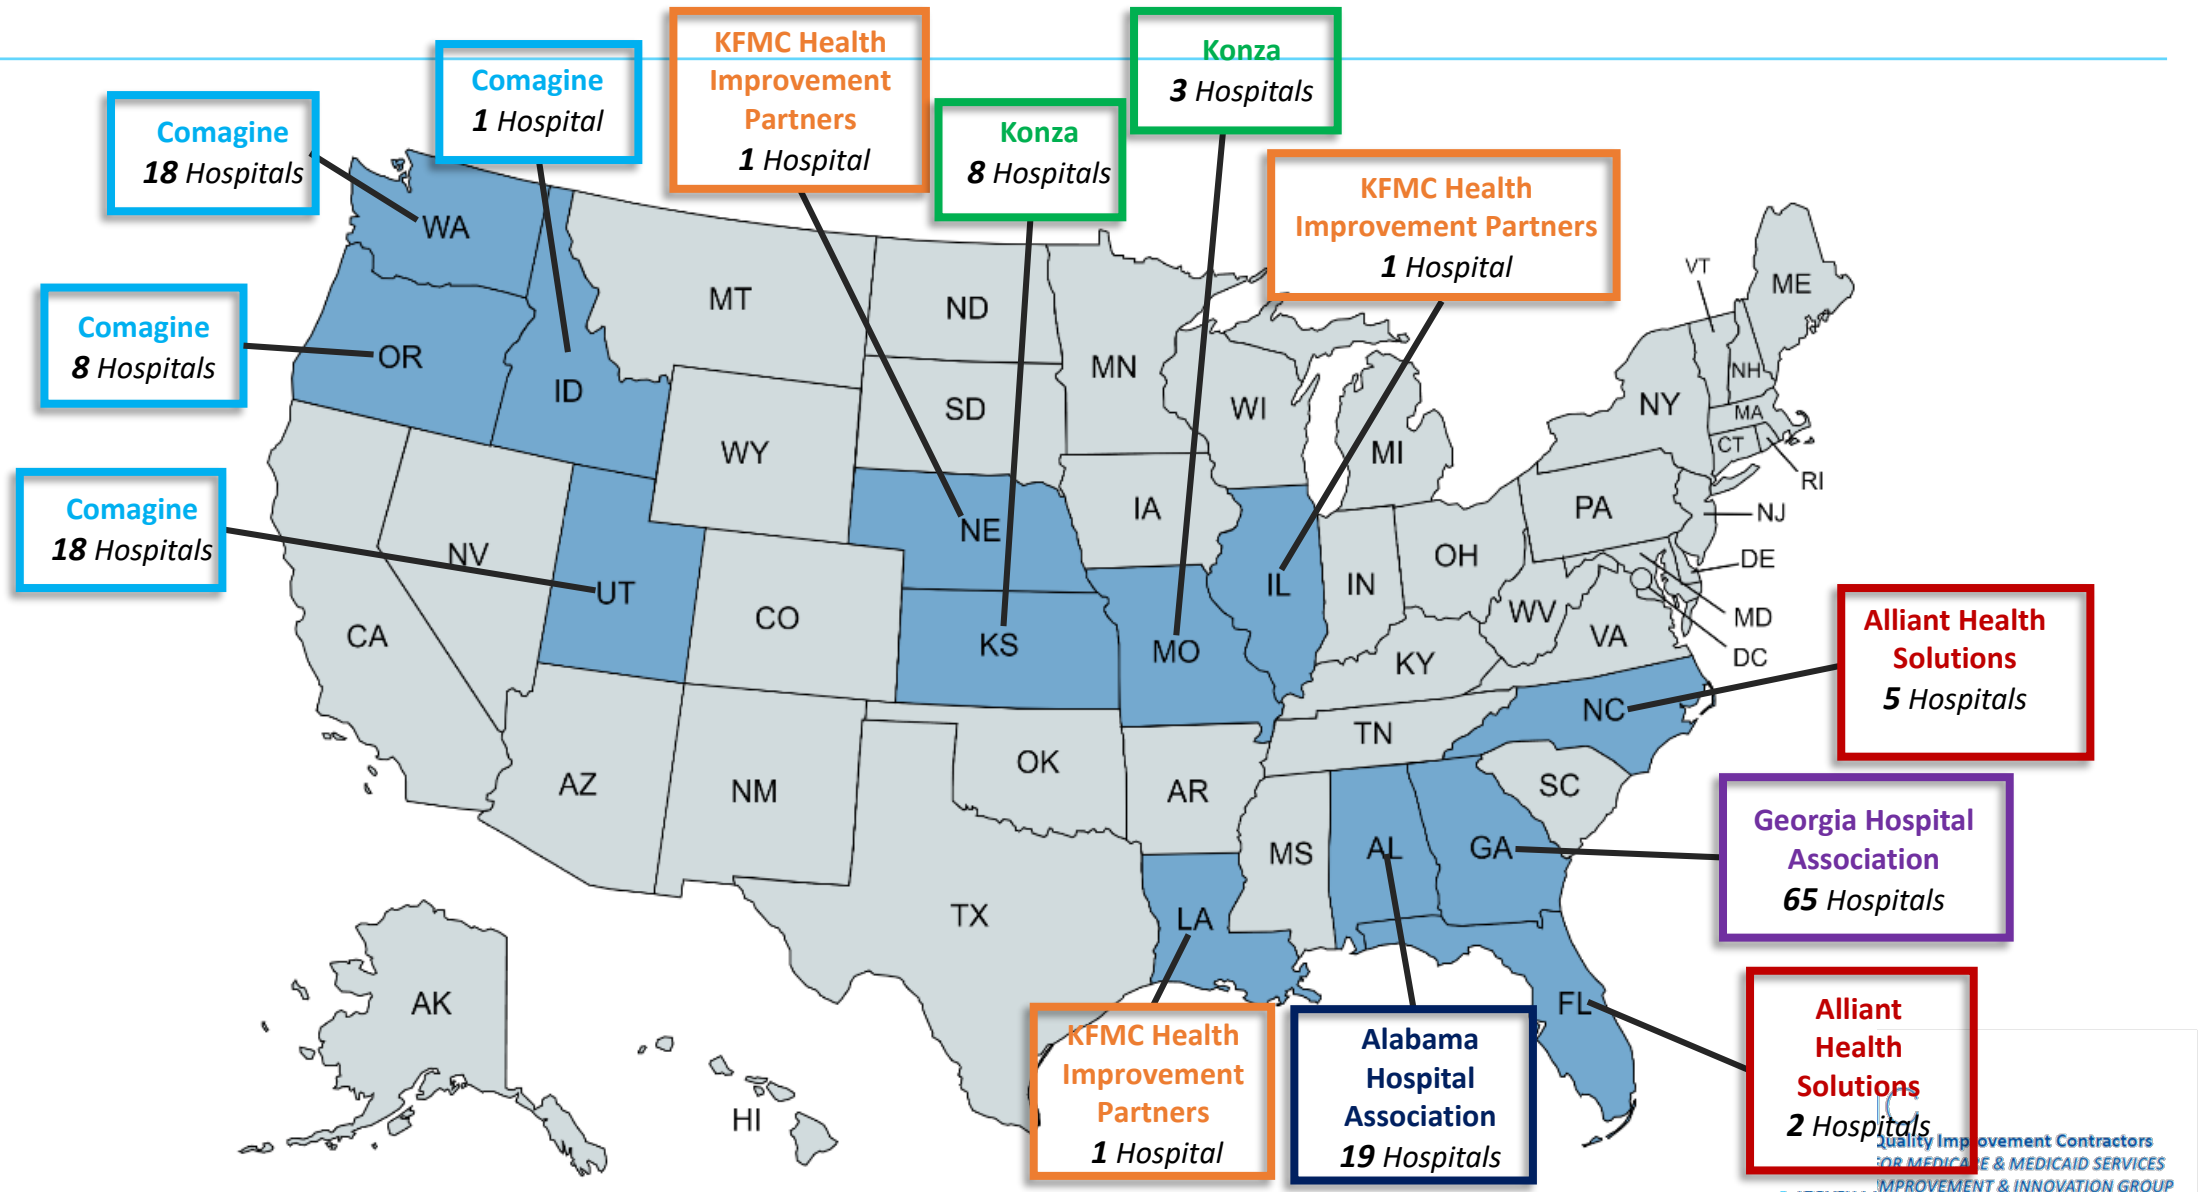

- Four year program active until October 2024
- Supports small, rural and critical access hospitals and facilities that care for vulnerable and underserved patients
- Provide assistance to hospital leaders and clinical teams:
 - Reduce opioid misuse and adverse drug events
 - Prevent hospital-acquired infections
 - Improve care coordination to reduce readmissions
 - Support for pandemic responses and emergency preparedness
- Enrolled hospitals = 150 from 13 states

Alliant HQIC Partners in Several States

- Alabama Hospital Association - Alabama
- Comagine - Idaho, Oregon, Utah and Washington
- Georgia Hospital Association - Georgia
- KFMC Health Improvement Partners - Illinois, Louisiana and Nebraska
- KONZA - Kansas and Missouri

150 Enrolled Hospitals by State and Partner

as of June 1, 2021

HQIC Evaluation Metrics and Goals By 2024*

Behavioral Health Decreased Opioid Misuse

- Decrease opioid-related ADEs by 7% including deaths
- Decrease opioid prescribing (<90MME) by 12%

Patient Safety Reduction of Harm

- Reduce ADEs by 13%
- Reduce all-cause harm by 9%
- Reduce Clostridioides *difficile* rates

Care Transitions Focus on High Utilizers

- Reduce readmissions by 5%

*For the nine Hospital Quality Improvement Contractors (HQICs)

Areas of Focus

Patient Safety

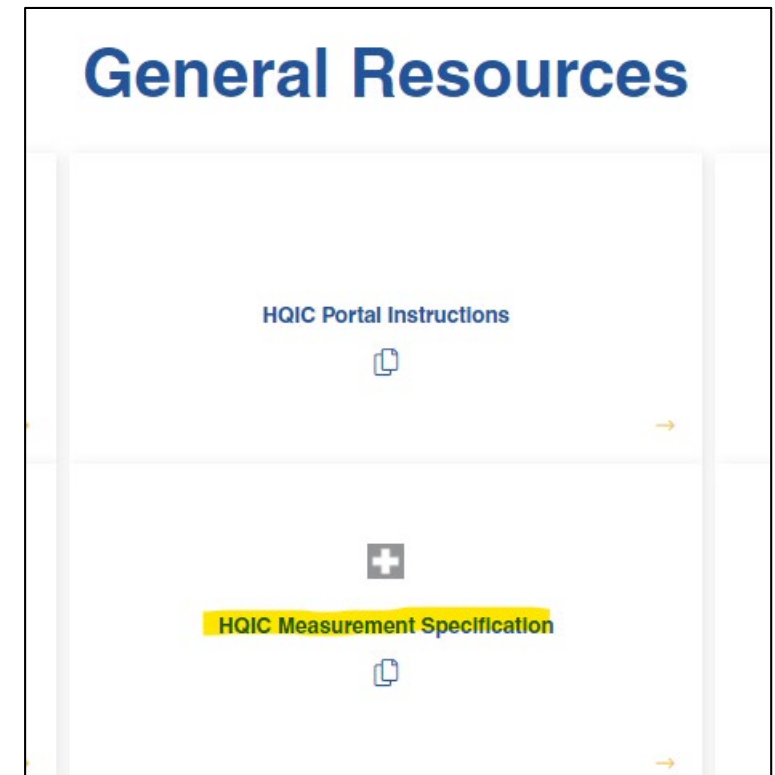

- Opioid Stewardship
- Adverse Drug Events (opioids, anti-coag, glycemic)
- CLABSI
- CAUTI
- C diff/MRSA
- Sepsis
- Pressure Injuries
- Readmissions

Other

- COVID-19 and/or public health emergencies
- Health disparities and health equity
- Patient and family engagement (PFE)
- Leadership engagement

HQIC Measures

- [HQIC Measurement Specification Posted on Alliant Website](#)
- Navigate to General Resources and click on Measurement Specifications to download file
- 24 measures listed in first tab and ICD-10 codes listed in other tabs

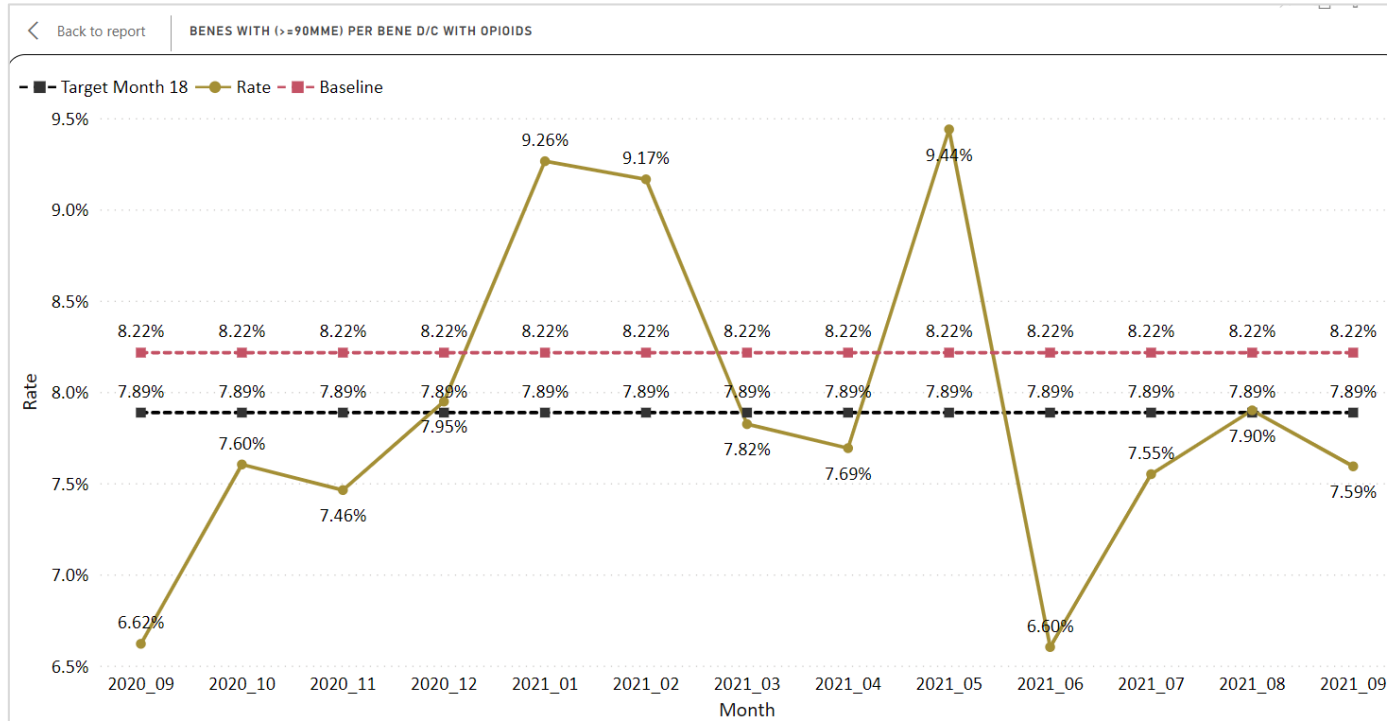

Achieving Goal: C diff Hospital Onset Rate for All Units

- 18 month goal is to decrease rate (no percentage given)
- Current rate is below 2019 baseline and target goal
- Continue to enter data into NHSN

N = 115/150 hospitals (77%)

Achieving Goal: High Dose Opioid Prescribing Upon Discharge

- 18 month goal = decrease by 2%
- Current rate is 7.84% which is below 2019 baseline (8.22%) and target goal (7.89%)

N = 139/150 hospitals (93%)

Almost Achieving Goal: 30 Day Readmissions

N = 147/150 hospitals (98%)

- 18 month goal = decrease by 1%
- Current rate is 15.92% which is below 2019 baseline (15.98%) but not quite below target (15.82%)
- Favorable downward trend May - Sep 2021

Joining a Group in NHSN and Accepting the Conferring Rights Template

Alliant Quality welcomes your hospital as a participant in the Hospital Quality Improvement Contractor (HQIC) program, a four-year program dedicated to improving behavioral health outcomes, patient safety and care transitions. This document explains how to confer National Healthcare Safety Network (NHSN) rights so Alliant Quality can view your data and provide seamless support and quality improvement assistance.

NHSN ID Number & Password

The group's 5-digit NHSN ID number: 83373
The group's joining password: Alliant20!

Note: A Group Administrator is an individual who will work regularly with the group's member hospitals.

Step 1: Joining a group.

The NHSN facility administrator can join the group by selecting "Group" in the NHSN left navigation bar and then clicking "Join." This will open the Memberships page. Enter the 5-digit Group ID and the Group Joining Password then click on "Join Group."

Note: Password is case sensitive.

The screenshot shows the NHSN interface. On the left, the navigation menu has 'Group' highlighted. A dropdown menu is open, showing 'Join' as the selected option. An arrow points from this menu to the 'Memberships' page. The 'Memberships' page has a form with 'Group ID' set to '83373' and 'Group Joining Password' set to 'Alliant20!'. A red arrow points to the 'Join Group' button.

NHSN Functions and Lessons Learned

- Can see data in numerous ways
 - Aggregate
 - Individual
 - System level
- Lessons learned
 - Healthcare Personnel Safety component requires a separate template that all group members need to accept
 - Template set up is critical
 - Joining group and conferring rights is not a guarantee that hospitals are reporting data to NHSN

Technical Assistance to Improve Reporting

To improve reporting among enrolled hospitals, technical assistance has been provided in several formats

- 1:1 coaching calls including hospital IP, Alliant SME, and quality improvement coaches
- Patient Safety Network Series
- IP Office Hours Series
- In Process – on demand, bite sized learning sessions to include information on
 - Facility mapping
 - Annual survey and monthly reporting plans
 - Summary data entry
 - Event level data entry
 - Running reports
 - Data analysis/interpretation

Testimonials - Infection Prevention SME and 1:1 Coaching

- As hospitals joined the Alliant HQIC, they were asked to begin submitting HAI data into NHSN
- Amy Ward stepped up and provided not just education and information, but support, encouragement, humor and compassion for our IPs
- Examples of why we love her so....
 - After hours PANIC calls and able to talk hospitals off the ledge
 - During mandate crisis with new submission requirements, Amy was able to hold COVID Office Hours weekly
 - Not just a resource for reviewing process flow, but she connects the dots...
 - Sets the bar and breathing relief into our IPs

Shondia Evans, Quality Improvement Coordinator

Testimonials - Use of Hospital Portal

- Brenda Duncan, RN, Director of Quality Management and Jerry Holley, RPh, Director of Pharmacy
- Russell Medical is an 81-bed hospital located in Alexander City, AL
- Monthly coaching calls with AlaHA and Alliant Pharmacy SME (Jennifer Massey)
- Identified increase in ADE anti-coagulants
- Opportunity for Improvement
 - Ability to identify ADE
 - Identify resources for best practice interventions
 - Utilize Alliant data to measure outcomes
- Goals
 - Recognition of ADE
 - Identify the cause of increased ADE
 - Determine how to identify cases

HEALTH SOLUTIONS

HQIC
Hospital Quality Improvement Contractors
CENTERS FOR MEDICARE & MEDICAID SERVICES
QUALITY IMPROVEMENT & INNOVATION GROUP

Testimonials - Use of Hospital Portal

- Pharmacy-led Interventions
 - Dosing protocols
 - Clinical data support
 - Dosage adjustments for renal and liver function
- How we benefited: Know Your Numbers
 - Access the HQIC portal
 - Review the ICD-10 captured data
 - Top five ICD-10 codes for claims
 - D649, D62, R791, K922, K921
 - These claims capture 80% of ADE
- Value of Alliant HQIC: Impacting anticoagulation safety and patient care through quality measurement

Testimonials - Drill Down Into the Data

- KFMC Health Improvement Partners and KONZA HIE (Health Information Exchange) recognized an opportunity to work together and utilize an HIE resource to assist hospitals with improvement efforts
- Hospital coaching calls are scheduled monthly
- Kansas hospitals can access KONZA HIE dashboard
- The KONZA HIE Workflow Specialist and KFMC Quality Consultant meet with hospital improvement teams to identify opportunities based on data and trends
- Value of Alliant HQIC: Harvest data using technology tools

Nadyne Hagmeier, RN
Quality Improvement Consultant

INDEX W/READMIT
48

READMIT RATE
11.9

TOTAL READMITS
48

Site Review of Data

- Determined vulnerability period for admits was 1-5 days after discharge
- Determined majority of readmissions occurred within the same facility
- Determined Heart Failure as #1 dx for readmission
- Determined certain patients had multiple readmission episodes for the same or similar diagnosis sequela

Suggested Interventions

- Consider f/u phone calls within 48 hours
- Consider review of Heart Failure continuum of care (order sets, discharge instructions, f/u appts completed, medication availability)
- Consider CCM for patients with multiple readmissions
- Utilize readmission risk assessment to identify high risk patients during inpatient stays
- Review Dashboard data regularly
 - Acute Alerts, to ID patients who need f/u from ER and Inpatient Visits
 - Utilization tile to review compliance with f/u visits
 - High Risk and Polychronic tiles to ID High Risk patients for CCM
 - Disease Registry for A1C and other CCM management interventions

Testimonials - Improvement Advisor and Data Analysis

- Lake Health District is a 24-bed Critical Access Hospital, a 24-bed skilled long term care cottages, a home health and hospice service, and outpatient clinic services
- Our facility is located more than 50 miles from the next closest critical access hospital and 90 miles from the next higher level of care centre at Sky Lakes in Klamath Falls, OR
- Worked with Improvement Advisor at Comagine Health to analyze readmission data and implement a readmission reduction program

Alena Acklin, MPH
Process and Quality
Improvement Coordinator

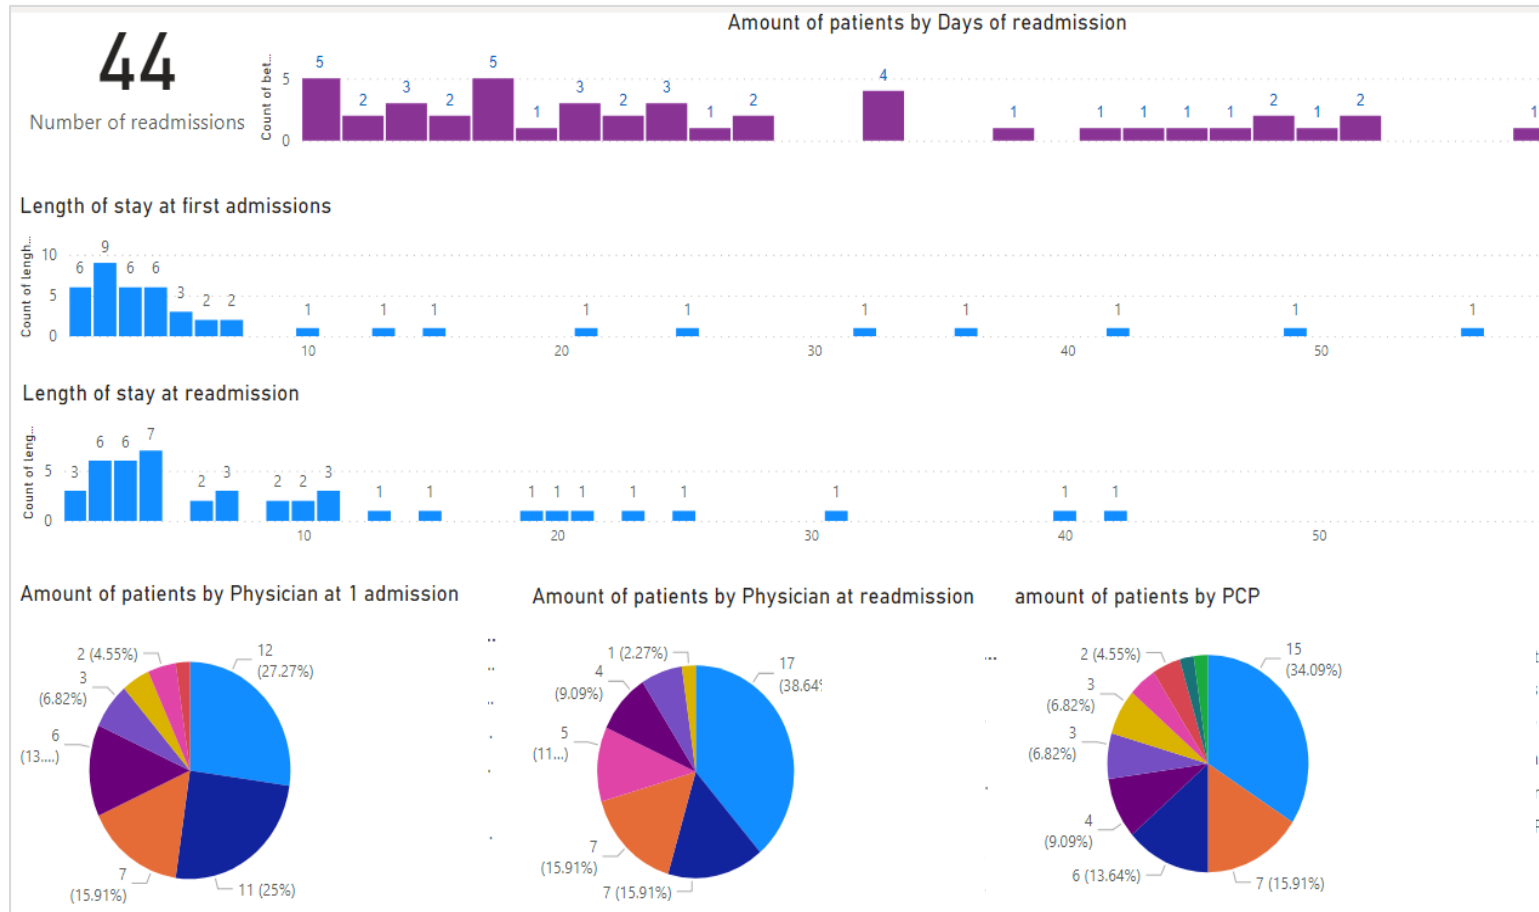

Testimonials - Improvement Advisor and Data Analysis

- Our readmission rates are between 4-11%
- We were looking for various ways to decrease readmission rates
- Work with Comagine to implement a readmission reduction program
- Personal challenge to operate in new role in Quality Department and in new environment

Testimonials - Improvement Advisor and Data Analysis

- Analysis using a custom view in Power BI
- We were using existing questions from providers and other specialists:
 - Length of stay and days between admissions
 - Relationship between PCP and admitting physician
- Improvement Advisor at Comagine guided us on analyzing the data

Testimonials - Improvement Advisor and Data Analysis

- Analyze existing patterns to make changes
- 66-75% of readmission happens among patients whose PCP and admitting physician were the same
- Currently implementing leading interventions with Improvement Advisor

Testimonials - Opportunity to Present on a National Level

- North Baldwin Infirmary is a 78 bed hospital located in Bay Minette, Alabama
- North Baldwin Infirmary works with Alabama Hospital Association
- Opportunity to Present on Success:
 - Developed a culture of safety
 - Daily hospital and departmental safety huddles, safety error prevention toolkit, and employee recognition programs
 - Safety has become the number one priority for everyone in our organization

Jo Ann Nix, RN BSN CMSRN
Chief Nursing Officer

Testimonials - Opportunity to Present on a National Level

- Impact to patient care: Decrease in safety events, infections and patient harm
- Value of Alliant HQIC: Opportunity to present on the Community of Practice* call in November 2021 allowed our rural hospital to share our success story with hospitals on a national level
- Hospitals have contacted us for information and Russell Medical was happy to share

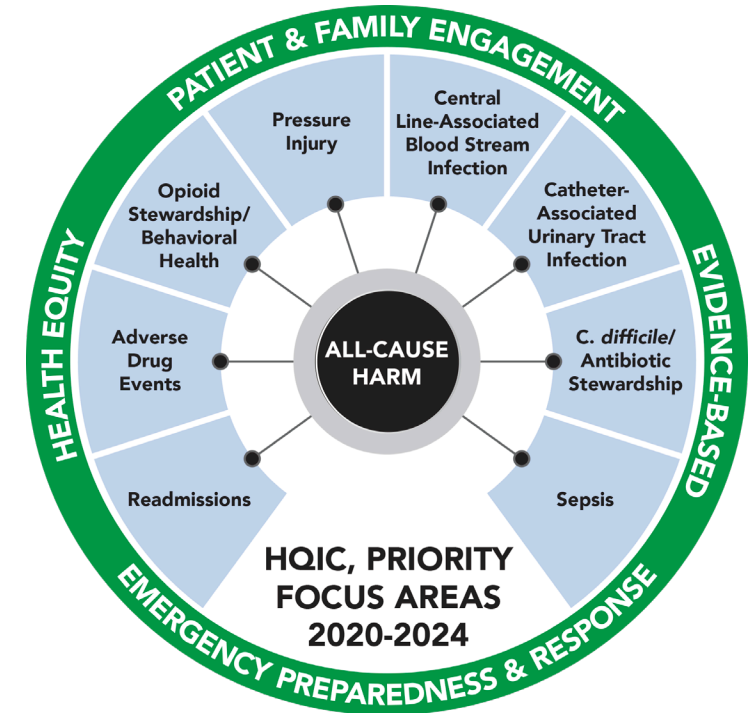

*Community of Practice is an webinar series led by the Centers for Medicare & Medicaid Services to share successes, strategies and best practices across the HQIC learning community in every state and territory

Educational Events and Networking

- Provide educational webinars on all patient safety topics with featured speakers from HQIC hospitals sharing success stories
- Subject matter experts and national thought leaders
- Alliant HQIC collaborates with other HQICs to deliver monthly Learning and Action Network (LAN) webinars
 - NEW! Key takeaways + action planning = [Change Path](#)
- Networking opportunity to attend and ask questions
 - Patient Safety Networks
 - COVID Office Hours – IP Chat
- On-demand education with presentation and recordings on website

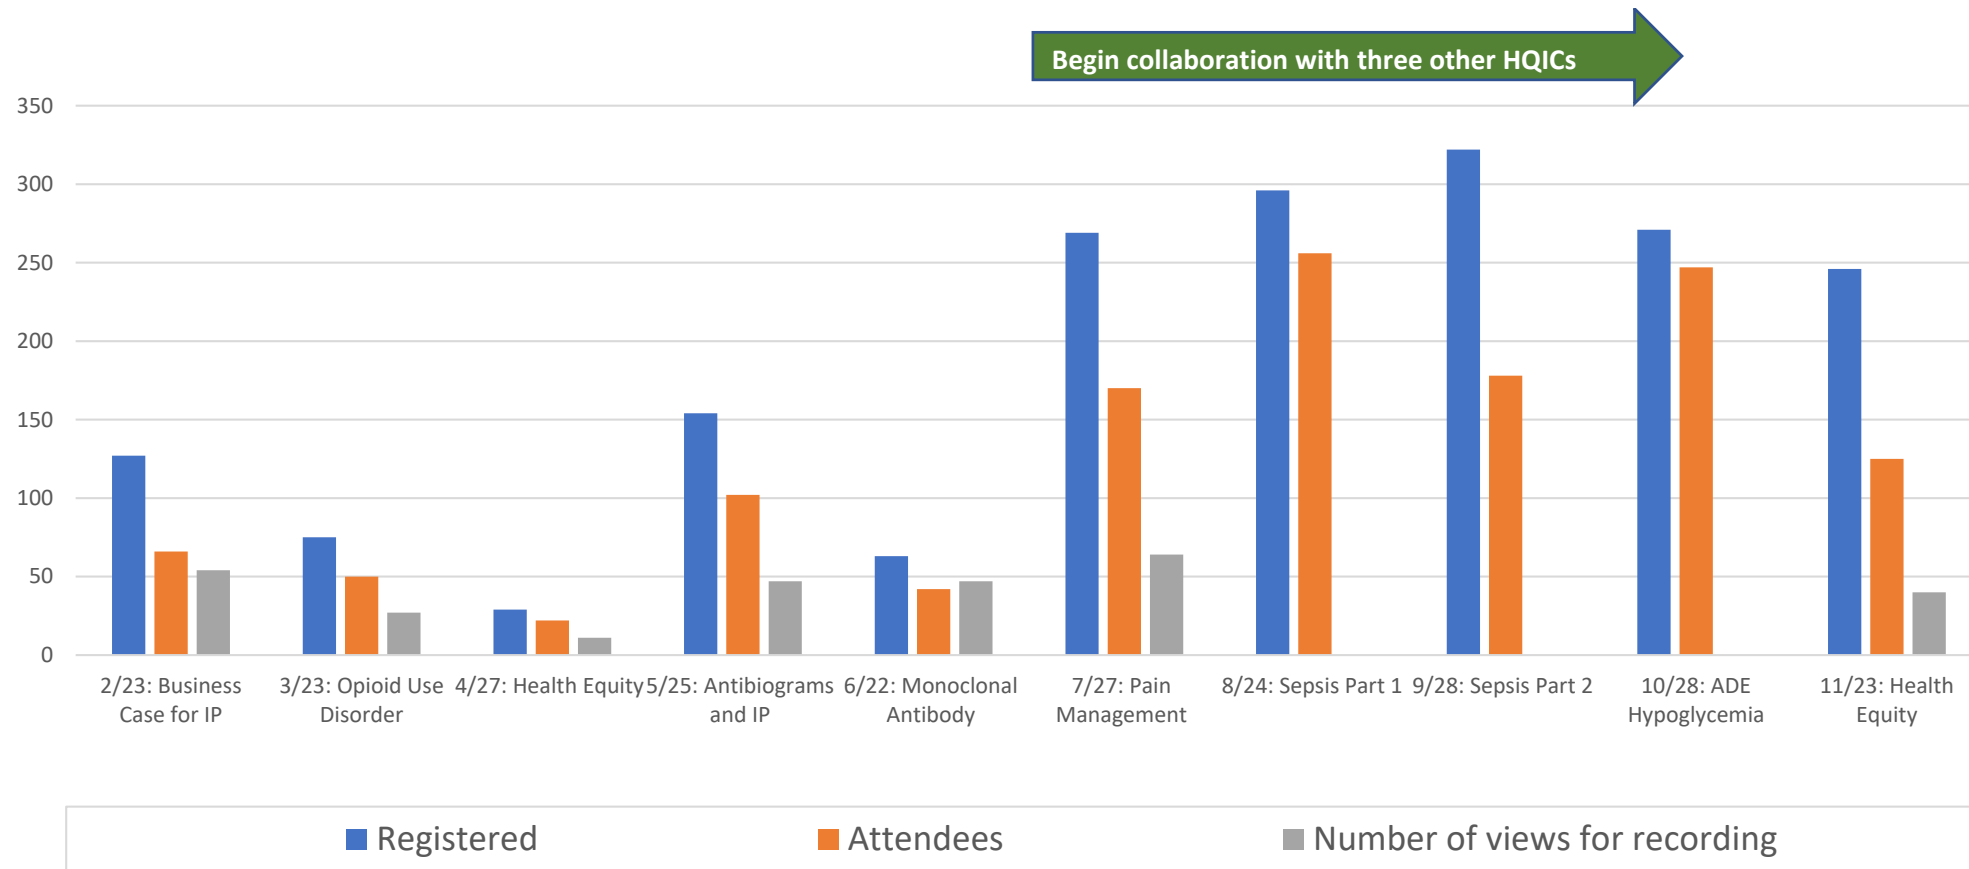

Learning and Action Networks (LANs)

- Monthly events hosted by Alliant and other HQICs to avoid duplication
- Focus on areas of patient safety, readmissions, patient and family engagement and health equity
- Either 30 or 60 minutes in length
- Registration links, past recordings and slides in newsletter and on Alliant website

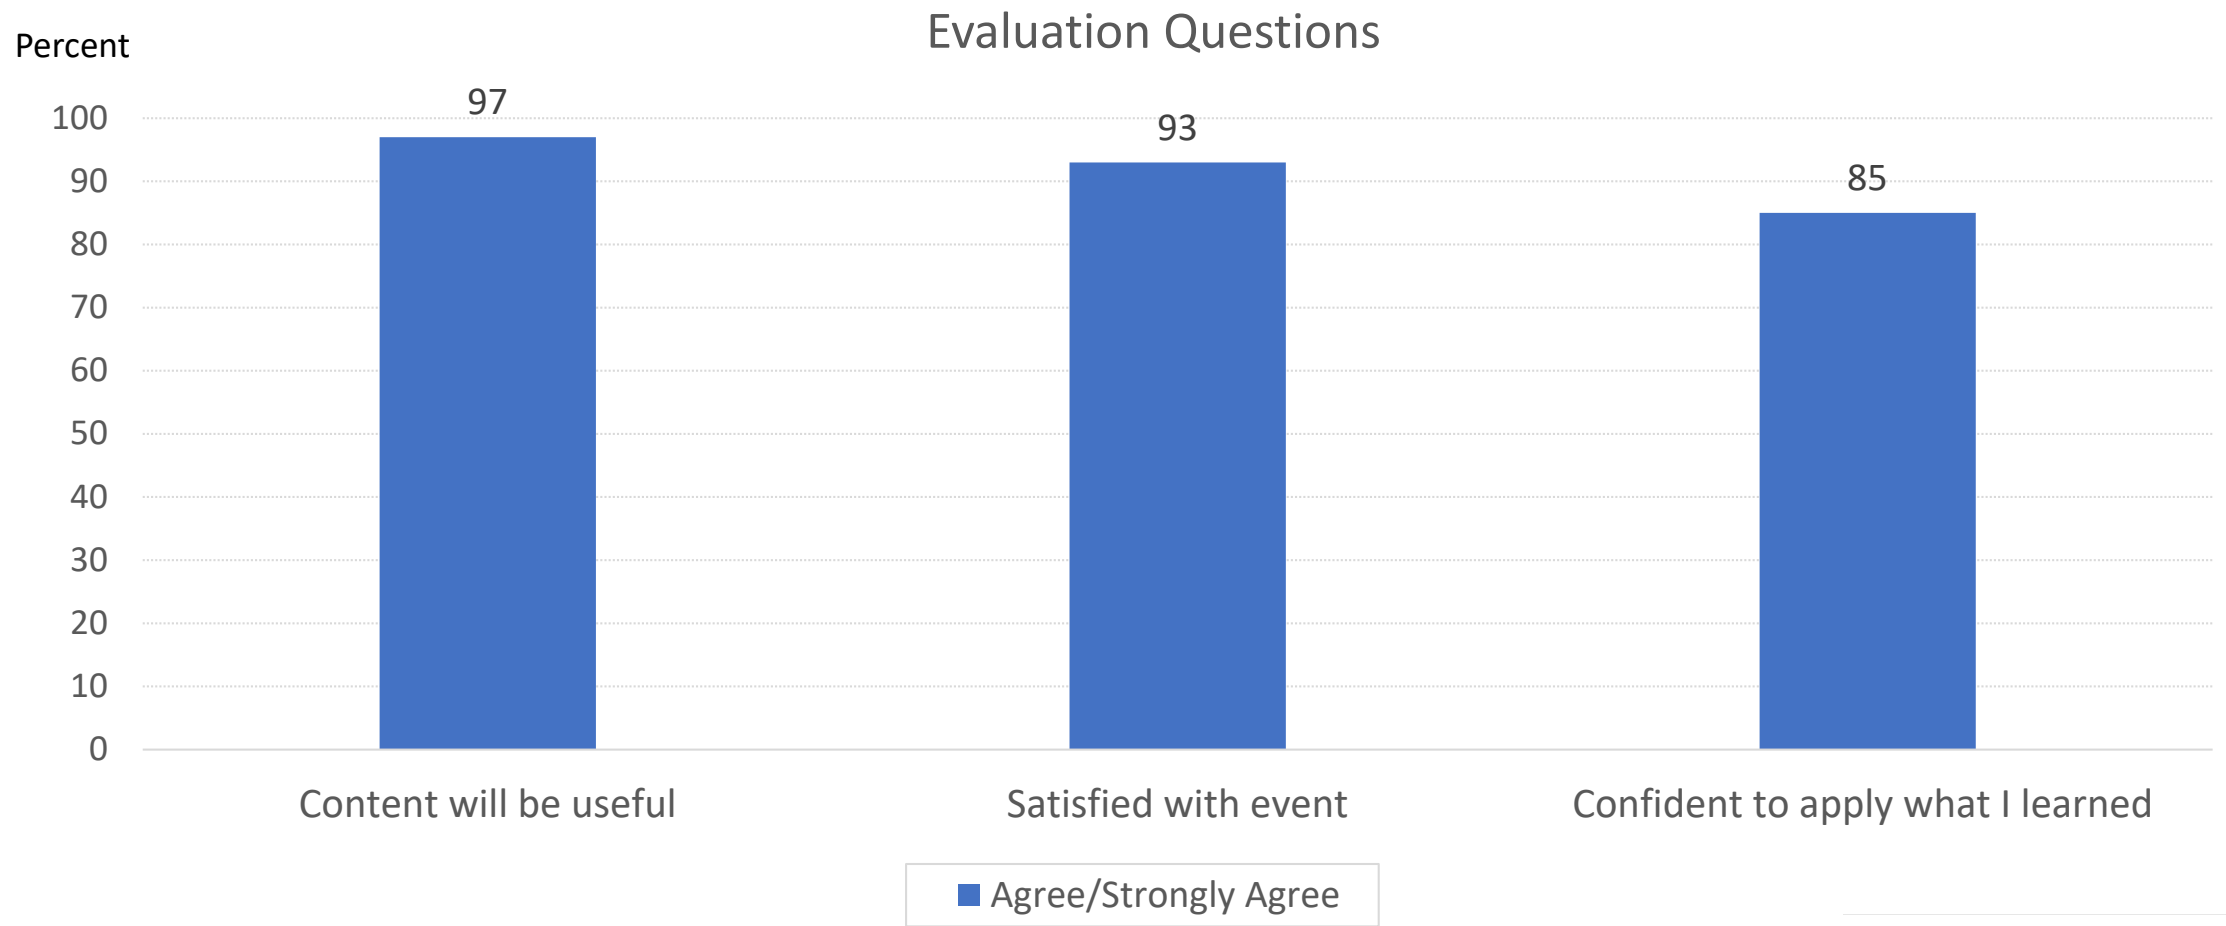

Learning and Action Networks (LAN) Metrics

Attendance increased >300% due to collaboration

Note: 8/24, 9/28, 10/28 hosted by another HQIC and recording views not available

Learning and Action Networks (LAN) Metrics

Note: Evaluation questions based on Kirkpatrick model: Level 1 Reaction and Level 2 Learning

Community of Practice (CoP) Calls

- Led by the Centers for Medicare & Medicaid Services to share successes, strategies and best practices
- Calls held on the second Thursday of month from 1:00 – 2:00 p.m. ET.
- Open to all Hospital Quality Improvement Contractors (HQIC) staff to help support the delivery and spread of quality improvement initiatives and **can extend invitation to their hospitals**
- Presentations and/or recordings posted on [Alliant HQIC Website](#)

[Disruption as an Opportunity to Improve Care | Sept. 23, 2021](#)

[Readmission Reduction: Transforming Into a Care Partner Hospital | Oct. 14, 2021](#)

★ [HQIC Community of Practice \(COP\) Call: Reducing Readmissions – Successful Rural Hospital Strategies | Nov. 18, 2021](#)

[Creating a Hospital Community's Social Needs Profile | Dec. 9, 2021](#)

Patient Safety Networks Fall/Winter Series

- 30 minutes webinars led by Subject Matter Experts and QI Advisors
- Topics include:
 - ADE Opioids and Opioids Stewardship
 - ADE Anticoagulants and Glycemics
 - IP (C. diff/MRSA, CLABSI, CAUTI)
 - Pressure Injuries
 - Sepsis Mortality and Sepsis Shock
 - Readmissions
- Average 25-30 in attendance allows for peer-to-peer networking
- Slides and recordings posted under On-Demand Education on Alliant HQIC website

QI 101 Training Begins February 3

- Designed for employees new to hospital quality improvement
- Based on evaluations from earlier Patient Safety Networks and need to improve “confident to apply what I learned” from LANs
- Three 30 min sessions led by QI professionals scheduled for first Thursday of month at 1 pm EST
 - Feb 3, Mar 3, Apr 7
- Basics of quality improvement teams/committees, data, PDSA model, tools and techniques
- Recordings posted to Alliant website for on-demand education
- Flyer with registration link to be distributed soon

COVID Office Hours - IP Chat Series Begins January 26

- Designed for IPs to stay up-to-date on current events, data, reporting, national trends and regulatory requirements of COVID and Infection Prevention topics
- Includes CIC exam question as time permits
- 30 minutes interactive sessions led by Alliant Infection Prevention Specialist
- Every other Wednesday from 2-2:30 pm ET
- No registration required
- Average 25-30 in attendance allows for peer-to-peer networking

HQICOfficeHours2022](https://bit.ly/HQICOfficeHours2022)**

The stress of this pandemic is weighing heavily on health care workers at all levels and in all disciplines. COVID-19 requires attention from the housekeeper to the CEO because we are all at risk from a personal and professional standpoint.

Alliant is aware that Infection Preventionist (IP's) are under additional pressure to ensure the organizations they serve are aware and responding to ever changing requirements. In our rural and critical access hospitals, many of the IP's are working in roles which limits the amount of time you have to stay up-to-date on all of the information you need to implement effective control measures as well as constantly sorting through new information as science evolves.

The COVID Office Hours chat sessions will occur on the 2nd and 4th Wednesday of each month and will provide up-to-date resources and sharing of best practices and barriers for the Infection Preventionists.

CMS Fact Sheet

Hospital Quality Improvement Contractors (HQICs) | Your Quality Improvement Leaders for Acute Care

The Centers for Medicare & Medicaid Services (CMS) Quality Improvement Organization (QIO) Program is one of the largest federal programs dedicated to improving the quality of health care at the community level. Hospital Quality Improvement Contractors (HQICs) are strategic partners of the QIO Program that support this mission within hospital settings. Their initiatives are designed to improve health care quality, access, value and equity for people with Medicare.

Health care quality is the overarching goal. The QIO Program and HQICs connect and convene the right people to help solve the nation's most pressing health care challenges, one community at a time.

What are HQICs?

Data-driven. It's the data that help hospitals measure progress toward quality improvement (QI) gains. Hundreds of thousands of patients and families benefit from CMS-supported QI projects that make today's hospital stays safer and improve the quality of hospital care.

Dynamic and collaborative. HQICs partner with small, rural and critical access hospitals and facilities that care for vulnerable and underserved patients. Their quality improvement consulting and expertise – offered at no cost to the hospitals – help hospital leaders and clinical teams develop local QI projects designed to:

- Reduce opioid misuse and adverse drug events.
- Increase patient safety with a focus on preventing hospital-acquired infections.
- Refine care coordination processes to reduce unplanned admissions.

HQICs also share their QI resources to assist hospitals with pandemic responses and emergency preparedness.

Local.	Measurable.	Sustainable.
<ul style="list-style-type: none"> • Provide no-cost quality improvement consulting to help leadership teams understand and implement Medicare and other federal health care guidelines. • Engage with hospital leaders and stakeholders to help tailor national QI priorities to local conditions. • Support health equity through patient and family engagement. • Coordinate goal setting, communication, QI resources and crisis response by facilitating partnerships with community, state and local organizations. 	<ul style="list-style-type: none"> • Help gather, analyze and interpret health care data to inform decisions that impact patients, families, partners and communities. • Visualize data to help hospitals track progress toward local and national quality goals. • Demonstrate how hospital processes can evolve in response to real-time data. 	<ul style="list-style-type: none"> • Create and spread learning opportunities for today's evidence-based best practices. • Develop peer and community networks for learning, collaboration and sharing. • Teach and coach QI processes and techniques for lasting change.

To Learn More

The four-year HQIC program will remain active through October 2024. Please visit [QIOProgram.org](https://www.cms.gov/medicare/medicaid-services/quality-improvement) to learn more about HQIC partners and QI initiatives.

Alliant HQIC Fact Sheet

MAKING HEALTH CARE BETTER

Alliant Quality - A Network of Quality Improvement and Innovation Contractor (NQIIC) with Demonstrated Success in Recruiting, Engaging and Improving Provider Performance

As the quality improvement services group of Alliant Health Solutions, Alliant Quality is a successful CMS contractor with a national footprint serving public and private customers in 12 states. Alliant Quality successfully manages work and effectively meets clients' quality improvement needs by:

- Operating as a clinically led and data-driven enterprise
- Being an experienced CMS contractor
- Demonstrating value across multiple clinical settings
- Providing customer service orientations
- Having prior positive work with Hospital Improvement and Innovation Networks (HIINs) and hospitals

Alliant Quality Experience

Alliant Quality has demonstrated long-term success providing hospitals with technical assistance for quality reporting and measure improvement. Our partnerships with Hospital Quality Improvement Contractors (HQICs) and hospitals have provided essential value-added experience such as:

- Establishing long-term relationships with providers that impact HQIC measures, such as community partners/long-term care facilities for readmissions
- Proven return on investment relative to time, resources and budget
- Improvement rates relative to the specific aims
- Implemented processes that impact short- and long-term efficiency goals

MEDICATION SAFETY

- Decrease opioid prescribing
- Decrease opioid adverse events

PATIENT SAFETY

- Reduce all cause harm
- Reduce adverse drug events
- Reduce avoidable readmissions
- Reduce incidence of C. Diff

CARE TRANSITIONS

- Reduce hospital admissions
- Reduce hospital readmissions
- Reduce emergency department visits

With decades of experience and access to hundreds of clinical specialists, Alliant Quality's company size allows us to provide personalized customer service and adapt to customer needs—all while putting patients first. We work collaboratively and combine strong data analytics with our clinical specialists to give context to the data while eliminating silos typically found on health care data teams. Alliant Quality helps make health care better by providing services that make health care safer and more effective.

For more information on how Alliant Quality can assist your team, please contact hospitalquality@alliantquality.org.
