Patient Safety Component (PSC)

INFECTION PREVENTION ONBOARDING CHECKLIST

To help manage your NHSN Patient Safety Component training progress, we've created this checklist and divided it into the Patient Safety Component's (PSC) different modules. For each NHSN PSC topic below, access the specified training guide and review the related materials. All the materials are available on the NHSN website unless otherwise noted.

Most NHSN training consists of online materials such as computer-based training (CBT) modules, Quick Learns, and recorded live webcasts. These can be found on the NHSN website (http://www.cdc.gov/nhsn/training). The NHSN website also contains the full PSC manual, individual protocols, forms, tables of instructions (TOIs) newsletters, frequently asked questions (FAQs), reports, and other important resources.

The checklist may be used in a variety of ways, a few examples include:

- Managers may use it to monitor the progress of new hires.
- Infection Preventionist may use it to manage their own learning process.

To get started:

- 1. Download and save a copy of the checklist
- 2. Click the hyperlink in the **COMPLETE TASKS** column
- 3. Review content and take notes as needed
- 4. Check the box next to each task to mark it complete

We are excited to provide this as a resource!
