

IS SOMEONE YOU KNOW CONFUSED?

*This could be a common condition called **DELIRIUM**.*

What is delirium?

Delirium causes a person's mind to become clouded and makes paying attention or focusing difficult.

What should you look for?

- Confusion
- Inability to pay attention or follow directions
- Difficulty understanding what is going on around them
- Acting differently

SPEAK

to your care team if the person is not him/herself

REMIND

the person you are concerned about of the day, date & where they are.

PROVIDE

glasses, hearing aids and dentures.

BRING

in family photos & personal items.

TALK

about family, friends & familiar topics.
