Connecting Your Hospital Culture of Safety to Patient Harm Reduction

Tuesday, January 17, 2023
2:00 - 3:00 PM (CT)

OVERVIEW

According to the New England Journal of Medicine in February 2022, the strides made toward improving patient safety were quickly and severely reversed amid the unprecedented COVID-19 pandemic that swept the nation indicating that the healthcare system lacks a sufficient resilient safety culture and infrastructure. This has brought to light an opportunity and obligation to reevaluate healthcare safety with an eye toward building a more resilient healthcare delivery system. Successful and sustainable patient safety improvement rests heavily on an organizational culture of patient safety, in which leadership supports systemwide attitudes, actions, teamwork, and technology to reduce the risk of patient harm.

TARGET AUDIENCE

Quality and infection control professionals, hospital leadership and nurse managers.

OBJECTIVES

- + Define the Culture of Safety framework
- + Describe the role of leadership in creating an environment that prioritizes safety and supports blame-free event reporting
- + Demonstrate how hospitals have been able to successfully improve patient safety within the Culture of Safety framework

BREAKOUT SESSIONS

- + **Culture and Collaboration: Key Contributors to Improving Sepsis Care** | Jodi Kierstead, RN, performance improvement specialist/sepsis lead from Northern Light AR Gould Hospital in Maine
- + **Opioid related Adverse Drug Events: Strategies to Prevent Patient Harm** | Lauren Woller, PharmD, BCP, director of pharmacy services from Athens-Limestone Hospital in Alabama
- + **Forming the Antibiotic Stewardship Multi-Disciplinary Team** | Rhonda Theiler, BSN, RN, QI nurse manager from Perkins County Health Services in Nebraska
- + **Eliminating Hospital Acquired Pressure Injuries Through Early Mobility** | Amanda Lass, MSN, RN, NE-BC, director of telemetry at Mary Greeley Medical Center in Iowa
