

The Impact of Vaccinations

As health care professionals, we have a responsibility to educate residents and patients on the benefits of vaccination and strongly recommend it.

Alliant Health Solutions, your Medicare Quality Improvement partner (QIN-QIO), is dedicated to your facility's vaccination campaign success. We **have the tools, tips and techniques to help** your facility achieve the highest protection against COVID, flu and pneumonia.

According to the CDC, **people 65 years and older** bear the greatest burden of severe disease and **account for the most flu and pneumonia-related hospitalizations and deaths.**

The absolute best way to guard residents from severe disease and hospitalization is through the protection provided by regular vaccination.

As your Medicare quality healthcare partner, **we have the best resources to make this season's vaccine campaign easy** and successful. We can help your facility:

- Improve low vaccine confidence
- Improve vaccination acceptance
- Improve understanding of vaccine safety
- Learn best practices to eliminate barriers to vaccination
