## IMPLEMENTING PATIENT AND FAMILY ENGAGEMENT IN RURAL HOSPITALS:

# Finding Solutions and Strategies

**Tuesday, July 23, 2024**

**1 p.m. ET | 12 p.m. CT**

### OVERVIEW:

Join the Telligen, I PRO, Alliant, and IHC Compass HQICs for this patient and family engagement (PFE) learning event! Patient and family engagement is the foundation of holistic, patient-centered care delivery and can positively impact hospital patient safety metrics.

This educational event will review the significance of each PFE best practice and discuss common challenges to implementation in the rural environment. Together, we will discuss implementation strategies that work in smaller hospitals. Join us!

### LEARNING OBJECTIVES:

1. Identify how PFE interventions positively impact patient care.
2. Review hospital PFE best practices and reflect on your hospital's current implementation status.
3. Analyze each PFE best practice from the perspective of a rural hospital and identify effective solutions for implementation.
4. Leave with clearly defined action steps to develop and/or progress your facility's individual PFE goals.
